

THE PUBLIC SCHOOL EMPLOYEES RETIREMENT ACT OF 1979 (EXCERPT)
Act 300 of 1980

ARTICLE 3

38.1341 Determining annual level percentage of payroll contribution rate; computation; unfunded actuarial accrued liability contribution rate; limitation; certification of estimated aggregate compensations; computation and certification of sum due and payable; payment; certification of actual aggregate compensations; adjustment; evidence of correctness; audit; duties of reporting unit; submission of difference occurring in certain fiscal years; interest rate; reassignment of assets; rate of investment return; basis of asset valuation; use of salary increase assumption; deposit to health advance funding subaccount; allocations from employer contributions; "current operating expenditures" defined.

Sec. 41. (1) The annual level percentage of payroll contribution rate to finance benefits being provided and to be provided by the retirement system shall be determined by actuarial valuation pursuant to subsection (2) upon the basis of the risk assumptions that the retirement board and the department adopt after consultation with the state treasurer and an actuary. An annual actuarial valuation shall be made of the retirement system in order to determine the actuarial condition of the retirement system and the required contribution to the retirement system. An annual actuarial gain-loss experience study of the retirement system shall be made in order to determine the financial effect of variations of actual retirement system experience from projected experience.

(2) Except as otherwise provided in this subsection, the contribution rate for benefits shall be computed using an individual projected benefit entry age normal cost method of valuation. Except as otherwise provided in this section, for the 1995-96 state fiscal year and for each subsequent fiscal year before the 2012-2013 state fiscal year, the contribution rate for health benefits provided under section 91 shall be computed using a cash disbursement method. Beginning in the 2012-2013 state fiscal year and for each subsequent fiscal year, if the contributions described in section 43e are determined by a final order of a court of competent jurisdiction for which all rights of appeal have been exhausted to be unconstitutional and the contributions are not deposited into the appropriate funding account referenced in section 43e, the contribution rate for health benefits provided under section 91 shall be computed using a cash disbursement method. The contribution rate for service likely to be rendered in the current year, the normal cost contribution rate, shall be equal to the aggregate amount of individual projected benefit entry age normal costs divided by 1% of the aggregate amount of active members' valuation compensation. Except as otherwise provided under this subsection, the contribution rate for unfunded service rendered before the valuation date, the unfunded actuarial accrued liability contribution rate, shall be the aggregate amount of unfunded actuarial accrued liabilities divided by 1% of the actuarial present value over a period not to exceed 50 years of projected valuation compensation, where unfunded actuarial accrued liabilities are equal to the actuarial present value of benefits, reduced by the actuarial present value of future normal cost contributions and the actuarial value of assets on the valuation date. Beginning with the 2012-2013 state fiscal year and for each subsequent fiscal year, the unfunded actuarial accrued liability contribution rate applied to payroll shall not exceed 20.96%. Any additional unfunded actuarial accrued liability contributions as determined under this section for each fiscal year are to be paid by appropriation from the school aid fund established by section 11 of article IX of the state constitution of 1963. Except as otherwise provided in section 41a, the unfunded actuarial accrued liability contribution rate shall be based upon and applied to the combined payrolls of the employees who are members and qualified participants.

(3) Before November 1 of each year, the executive secretary of the retirement board shall certify to the director of the department the aggregate compensation estimated to be paid public school employees for the current state fiscal year.

(4) On the basis of the estimate under subsection (3), the annual actuarial valuation, and any adjustment required under subsection (6), the director of the department shall compute the sum due and payable to the retirement system and shall certify this amount to the reporting units.

(5) The reporting units shall make payment of the amount certified under subsection (4) to the director of the department in equal payroll cycle installments for unfunded actuarial accrued liability contributions and payroll cycle installments for normal cost contributions.

(6) Not later than 90 days after termination of each state fiscal year, the executive secretary of the retirement board shall certify to the director of the department and each reporting unit the actual aggregate compensation paid to public school employees during the preceding state fiscal year. Upon receipt of that

certification, the director of the department may compute any adjustment required to the amount due to a difference between the estimated and the actual aggregate compensation and the estimated and the actual actuarial employer contribution rate. The difference, if any, shall be paid as provided in subsection (9). This subsection does not apply in a fiscal year in which a deposit occurs pursuant to subsection (14).

(7) The director of the department may require evidence of correctness and may conduct an audit of the aggregate compensation that the director of the department considers necessary to establish its correctness.

(8) A reporting unit shall forward employee and employer social security contributions and reports as required by the federal old-age, survivors, disability, and hospital insurance provisions of title II of the social security act, 42 USC 401 to 434.

(9) For an employer of an employee of a local public school district or an intermediate school district, for differences occurring in fiscal years beginning on or after October 1, 1993, a minimum of 20% of the difference between the estimated and the actual aggregate compensation and the estimated and the actual actuarial employer contribution rate described in subsection (6), if any, shall be paid by that employer in the next succeeding state fiscal year and a minimum of 25% of the remaining difference shall be paid by that employer in each of the following 4 state fiscal years, or until 100% of the remaining difference is submitted, whichever first occurs. For an employer of other public school employees, for differences occurring in fiscal years beginning on or after October 1, 1991, a minimum of 20% of the difference between the estimated and the actual aggregate compensation and the estimated and the actual actuarial employer contribution rate described in subsection (6), if any, shall be paid by that employer in the next succeeding state fiscal year and a minimum of 25% of the remaining difference shall be paid by that employer in each of the following 4 state fiscal years, or until 100% of the remaining difference is submitted, whichever first occurs. In addition, interest shall be included for each year that a portion of the remaining difference is carried forward. The interest rate shall equal the actuarially assumed rate of investment return for the state fiscal year in which payment is made. This subsection does not apply in a fiscal year in which a deposit occurs pursuant to subsection (14).

(10) Beginning on the designated date, all assets held by the retirement system shall be reassigned their fair market value, as determined by the state treasurer, as of the designated date, and in calculating any unfunded actuarial accrued liabilities, any market gains or losses incurred before the designated date shall not be considered by the retirement system's actuaries.

(11) Except as otherwise provided in this subsection, beginning on the designated date, the actuary used by the retirement board shall assume a rate of return on investments of 8.00% per annum, as of the designated date, which rate may only be changed with the approval of the retirement board and the director of the department. Beginning on July 1, 2010, the actuary used by the retirement board shall assume a rate of return on investments of 7.00% per annum for investments associated with members who first became members on and after July 1, 2010, which rate may only be changed with the approval of the retirement board and the director of the department.

(12) Beginning on the designated date, the value of assets used shall be based on a method that spreads over a 5-year period the difference between actual and expected return occurring in each year after the designated date and such methodology may only be changed with the approval of the retirement board and the director of the department.

(13) Beginning on the designated date, the actuary used by the retirement board shall use a salary increase assumption that projects annual salary increases of 4%. In addition to the 4%, the retirement board shall use an additional percentage based upon an age-related scale to reflect merit, longevity, and promotional salary increase. The actuary shall use this assumption until a change in the assumption is approved in writing by the retirement board and the director of the department.

(14) For fiscal years that begin on or after October 1, 2001, if the actuarial valuation prepared pursuant to this section demonstrates that as of the beginning of a fiscal year, and after all credits and transfers required by this act for the previous fiscal year have been made, the sum of the actuarial value of assets and the actuarial present value of future normal cost contributions exceeds the actuarial present value of benefits, the amount based on the annual level percent of payroll contribution rate pursuant to subsections (1) and (2) may be deposited into the health advance funding subaccount created by section 34.

(15) Notwithstanding any other provision of this act, if the retirement board establishes an arrangement and fund as described in section 6 of the public employee retirement benefit protection act, 2002 PA 100, MCL 38.1686, the benefits that are required to be paid from that fund shall be paid from a portion of the employer contributions described in this section or other eligible funds. The retirement board shall determine the amount of the employer contributions or other eligible funds that shall be allocated to that fund and deposit that amount in that fund before it deposits any remaining employer contributions or other eligible funds in the pension fund.

(16) As used in this section, "current operating expenditures" for a public local school district includes functions 1xx, 2xx, 45x, and all object codes except 6xxx, as defined in the Michigan Public School Accounting Manual Bulletin 1022, and is equal to the total of instructional and support services expenditures, including the total general fund charges incurred in the general, special education, and vocational education funds for the benefit of the current fiscal year, whether paid or unpaid, and all expenditures of the instructional programs plus applicable supporting service costs reduced by capital outlay, debt service, community services, and outgoing transfers and other transactions. Current operating expenditures for a public local school district also include operating funds for any public school or other public educational entity first authorized or established by the public local school district on or after the effective date of the amendatory act that added this subsection.

However, the Michigan Supreme Court also held that it has no authority to order the governor or legislature to appropriate funds. *Musselman v Engler*, 448 Mich 503; 533 NW2d 237 (1995).

Sec. 41a. For fiscal years that begin on or after March 28, 1996, the retirement system shall determine a separate contribution rate for a reporting unit that is a university listed in the definition of public school employee under section 6. The retirement system shall determine the separate contribution rate in the manner prescribed in section 41, except that the unfunded actuarial accrued liability shall be amortized over 40 years beginning October 1, 1996 and ending on September 30, 2036, with the payment schedule for universities being based on and applied to the combined payrolls of the universities' employees who are members and who were hired before January 1, 1996 and the universities' employees who would have been members on or after January 1, 1996, but for the enactment of 1995 PA 272. The amount of the unfunded accrued liability on which the separate contribution rate is determined shall be that amount which a reporting unit that is a university listed in the definition of public school employee under section 6 is legally responsible for and is calculated by actuarial analysis. Any reduction in the unfunded liability of the system pursuant to governmental action affecting the entire system will be allocated to all reporting units including universities as determined by the system's actuary. For the 2006-2007 state fiscal year, the contribution for unfunded actuarial accrued liability shall be equal to 4.5% of the unfunded actuarial accrued liability.

38.1342 Reporting unit contribution; exclusive obligation; contributions picked up by employer; deduction of social security contributions; agreement of member; forwarding certain retirement contributions; failure to submit report or contributions; late fee; withholding payment of state funds for noncompliance.

Sec. 42. (1) Beginning with the 1994-95 state fiscal year, a reporting unit shall contribute the entire amount determined under section 41 to the reserve for employer contributions and to the reserve for health benefits. The reporting unit contribution under this subsection is the exclusive obligation of the reporting unit payable out of general budget resources of the reporting unit, including funds available under local millage and other local resources and from the state school aid allocation to the reporting unit, and shall not be a separate obligation by specific reimbursement or otherwise of this state.

(2) As authorized by resolution or other enabling act of its governing body, the employer shall pick up all contributions of a member made pursuant to section 43a for all compensation paid on or after January 1, 1987 and reported to the retirement system. Although considered contributions of a member for certain purposes under this act, all contributions picked up shall be treated as paid by the employer in lieu of contributions by the employee. Contributions picked up as provided in this subsection shall be paid from the same source of funds that is used for paying compensation to the member. The employer may pick up these contributions by either a reduction to the member's cash salary, an offset against a future salary increase, or a combination of a reduction in salary and offset against a future salary increase. This subsection does not apply, and the employer shall not deduct, offset, or remit contributions, until the department receives notification from the United States internal revenue service that contributions picked up shall not be included as gross income of the member until they are distributed or made available to the member, retirant, retirement allowance beneficiary, or refund beneficiary.

(3) The employer shall deduct from a member's compensation the contributions for social security provided in 1951 PA 205, MCL 38.851 to 38.871. Contributions shall be made while the member remains a public school employee. Each reporting unit official shall deduct the social security contributions from the compensation of each member for each payroll period after the date the employee becomes a member. Social security contributions shall be made notwithstanding that the minimum compensation provided by law is changed. Each member is considered to have agreed to the contributions prescribed in this subsection.

(4) Each reporting unit official shall forward member contributions to the retirement system on a schedule and in a manner determined by the retirement system.

(5) Each reporting unit official shall forward the entire employer contribution required by this act to the retirement system on a schedule and in a manner determined by the retirement system.

(6) Each reporting unit official shall submit to the retirement system a report that includes the information for retirement purposes, including, but not limited to, persons employed, retirants performing services at a reporting unit who are employed by an entity other than the reporting unit or who are independent contractors, wages or amounts paid, hours, and contributions required under this act. The report shall contain the information on a pay period basis and shall be submitted to the retirement system on a schedule and in a manner determined by the retirement system. The superintendent for a reporting unit or the chief administrator for a reporting unit that does not have a superintendent shall complete an annual certification that gives authorization for the employees of the reporting unit to report the information to the retirement

system.

(7) If a reporting unit fails to submit a report or contributions, or both, according to the schedule established by the retirement board, a late fee shall be paid by the reporting unit. If the remittance of contributions is late, the late fee shall include interest for each day that the remittance of contributions is late. The retirement board periodically may establish the late fee, which shall not be less than \$25.00, and interest charges, which shall not be less than 6% per annum. If a reporting unit fails to correct errors on a report before the errors are discovered by the retirement system or if such errors are intentional, the reporting unit shall pay the late fee and interest charges as described in this subsection for each day that the report is in error, unless reasonable cause is shown to the satisfaction of the retirement system.

(8) Upon written notice from the retirement board, the superintendent of public instruction and the state treasurer shall withhold payment of state funds, in part or in whole, payable from the state school aid appropriation or higher education appropriations to a reporting unit that fails to comply with this section.
